

Get Your Gas or Electric Furnace Safety Inspected & Tuned Up For Just \$79

(Total \$132 Value)

Is money the most important thing in life?

Of course, that's a rhetorical question, and of course, the answer is no.

And yes, the Furnace Safety Inspection & Precision Tune-Up will save you money. We've found that it saves on average, the entire amount of the service... or more, over the course of a season.

But you and I know that's not even close to the most important thing. The most important thing, without question of course, is your family's safety.

So, why do most people skip having this essential procedure done?

I don't know for sure. Maybe they're trying to scrimp and save. Maybe they're worried about some dirty technician messing up their home. Or... maybe they know it should be done, and just failed to make it a priority.

Whatever the reason, I urge you to get your furnace safety inspected, along with having it professionally cleaned and tuned up. And if you don't get it done with my company... please get it done by someone. A licensed professional. Just get it done. Your family is precious.

"I have an Electric Furnace, not a Gas Furnace. Is there the same potential safety risk?"
Doesn't matter. Last year, in this area, an electric furnace started a house fire. This year, there's been a gas explosion. Gas or Electric... Both need to be Safe.

Call today. I'll have one of my Neat, Clean, Old Fashioned Friendly, Drug Free, Background Checked Professional Technicians come out and do a complete, 15-step, Safety Check and Precision Tune-up & Professional Cleaning for just \$79. Call 270-259-3176.

Yours for a safe winter,
David Allen
